State Engineer's Office

Mr. Reid Jerman,
State Engineers Office,
Salt Lake City, Utah.

Dear Mr. Jerman:

This will acknowledge receipt of your letter of April 30th.

Mr. Wayman and I have had a conference with the Demarcos and Elegantis some ten days ago and they have not as yet reported to us their decision in regards to the distribution of water from the Spring Canyon Wash. We proposed that they take the water on a fifty fifty basis. This the Demarcos were willing to do, but the Elegantis wanted to keep the Crystal Spring for their own use and of course if the entire stream could not be used on the turn plan, Demarcos would not play.

I was sure that some agreeable understanding and plan could be worked out after talking with each of the parties separately, but when the bunch gets together, it is another story. Wayman got a little hard boiled at a fellow who lives with Demarcos when he spoke out of turn, and of course this set the Elegantis off, and had we not left, I am sure there would have been a real old fashioned hair pulling among the women folks.

If anything turns up within the next few days one war or another, I shall let you know.

Very truly yours,

Oliver B. Madson

County Agent.
